1. Open Internet Explorer and enter [https://vpn.scripps.org](https://vpn.scripps.org) in the Address line as below.

![Google Chrome with VPN scripps.org](image)

2. Enter your Username and Password and click the *Sign In* button.

![Scripps SSL VPN Sign In](image)

3. The first time connecting you will receive several User Account Control and Windows Security Warnings. Click the options displayed below.

   - Click the *Continue* button if you receive this warning.
   
   ![User Account Control](image)

   - Click the *Install* button if you receive this warning.

   ![Internet Explorer Add-on Installer](image)
Click the *Always* button if you receive this warning.

Click the *Continue* button if you receive this warning. The filename may not be the same but it will indicate that it is from Juniper Networks, Inc.
4. You will receive the message below for the **Secure Application Manager Proxy** each time you connect. Click on the **Continue** button.

   ![Secure Application Manager Proxy](image)

5. The first time connecting you will receive the window below. Click the **Cancel** button. If you receive a second window similar to the image below click the **Cancel** button on it also.

   ![Window](image)

You are now logged in to the SSL VPN but as the image above indicates your computer must restart to complete the configuration. Click the **Sign Out** button and restart your computer.

![Logged In](image)

6. After your computer restarts, follow steps 1, 2, 3 and 5, skipping steps 4 and 6. When you’ve logged in you will see the left image below. Verify that the icon circled in the left image is in your System Tray. If it is not, scroll down and click the **Start** button next to **Windows Secure Application Manager** as shown in the right image below.
